

How to clear Cache/Browser History on Firefox (Mobile)

Android

Clear your entire browsing history

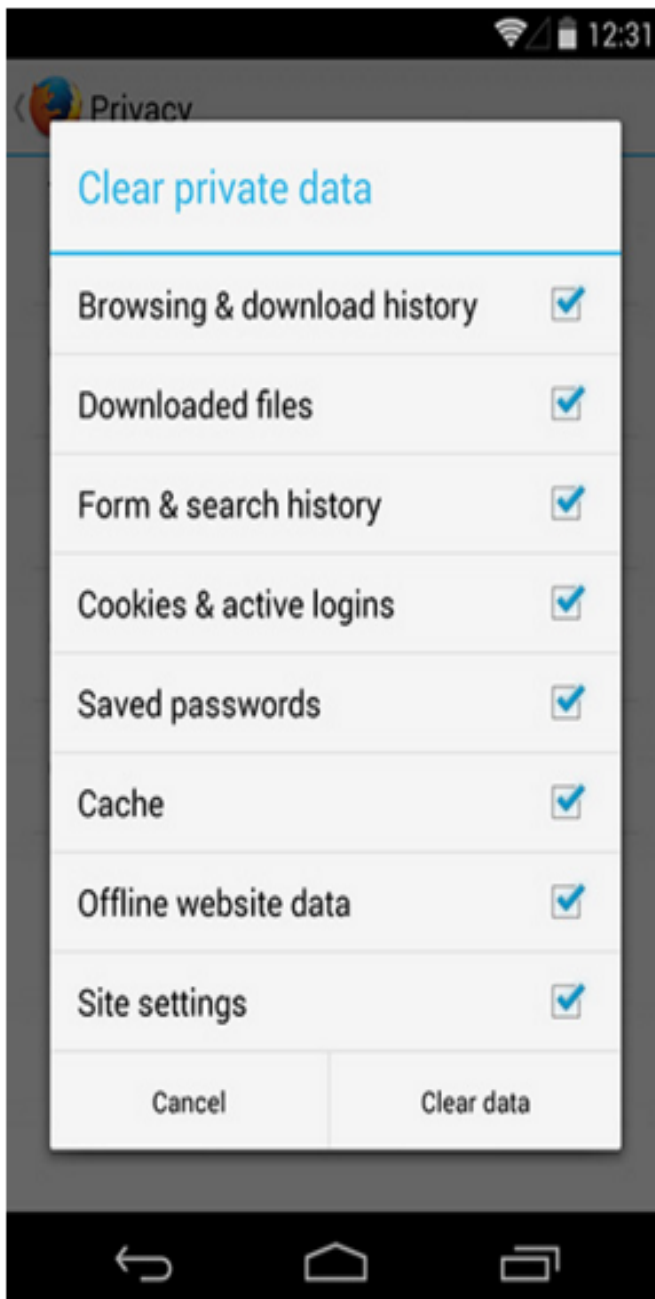

1. Go to the *History* panel on your home screen.
2. Tap on **Clear browsing history** at the bottom of the *History* panel.

3. Tap to confirm.

Clear specific items from your browser

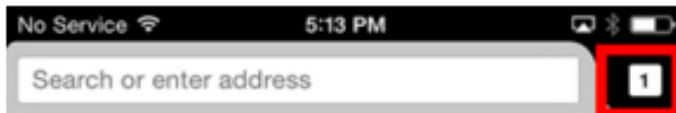

1. Tap the menu button (either [below the screen on some devices](#) or at the top-right corner of the browser) and select **Settings** (you may need to tap **More** first) .
2. Tap **Privacy** and choose **Clear now** .
3. Put a check mark next to the items you want to clear and then tap **Clear data**

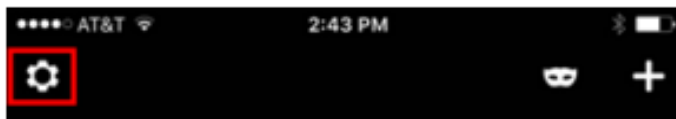

Clear browsing history in Firefox for iOS

Firefox stores websites you've visited in your history as you browse the Web. Follow these steps to delete your history.

1. Tap the tab icon at the top of the screen.

2. Tap the cogwheel icon to open the Firefox *Settings* menu.

3. In the Firefox Settings menu, under the Privacy section, tap **Clear Private Data**.
4. Tap the switch next to the types of information you'd like to remove.
5. In the **Clear Everything** dialog, tap **Clear** to clear all of your data including history.

Caution: Clearing your private data will close all your active tabs.

What types of information can I remove?

- **Browsing History** - addresses and cached text for websites you've visited. Clearing this will remove these websites from your [top sites](#).
- **Cache** - parts of web pages that are stored in the browser to make them load faster the next time you visit.
- **Cookies** - files that contain information about your visit to a website, including site preferences and user information.
- **Offline Website Data** - Files a website stores in your device (if you've allowed it) so you can continue to use it offline.
- **Saved Logins** - Records of usernames and passwords.
